Terminology: LOD = Limit of Detection. LOQ = Limit of Quantification. ND = Non Detect. **Totals represent post-decarboxylated values.**

### Notes

Extracted cannabinoid content from capsule using "Keurig K-Classic Coffee Maker" with 8 oz setting per customer instruction.

Per customer request, additional testing was performed with a regular coffee cup immediately following the customer sample. No analytes were detected.

Testing results are based solely upon the sample submitted to KYP Labs, LLC, in the condition it was received. KYP Labs, LLC warrants that all analytical work is conducted professionally in accordance with all applicable standard laboratory practices using validated methods.

Analysis is performed using an Agilent 5890 Series II Gas Chromatograph equipped with a 15m Restek RTX-34Sil MS column using a flame ionization detector (FID) following a lab validated method utilizing certified reference standards for each chemical analyzed.

The result applies only to the sample listed on this certificate. KYP Labs cannot guarantee that this sample is representative of the product/lot as a whole. KYP Labs warrants that this study was performed in accordance with appropriate laboratory research practices and protocols for the sample submitted.
